

Endpoints for Geography

Year 3 – One Planet, Our World

This topic gives us the opportunity to locate countries and cities around the world, using grid references, compass points and lines of longitude and latitude.

What I know and can explain

Maps, globes and digital mapping tools can help to locate and describe significant geographical features such as countries, oceans and seas

The four intercardinal points on a compass are north-east, south-east, south-west and north-west

The crust of the Earth is divided into tectonic plates that move

Europe is a continent in the Northern Hemisphere. It has over 50 countries, including transcontinental countries such as Russia

Cities are characterised by factors such as size, population, location and their physical and human features

Useful Vocabulary

Climate - The general weather conditions found in a place over a period of time

Continent - One of seven large land masses on the Earth's surface, mainly surrounded by sea

Continental drift - The gradual movement of the continents over the Earth's surface

County - An area of the United Kingdom that a local government manages

Molten - Something that has melted and is in a liquid state

Plate boundary - The place where two tectonic plates meet
